

INVESTMENT OBJECTIVE

The Securis Catastrophe Bond Fund (“SCBF” or the “Fund”) aims to generate returns and growth by investing in catastrophe bonds (“Cat Bonds”). A Cat Bond is a form of insurance linked security that transfers the risk of financial loss as a result of catastrophic events to the capital markets. The sponsors of the Cat Bonds are typically insurance companies, reinsurance companies, corporations and governments. Cat Bonds may pay fixed, floating or variable rates of interest and typically have durations of between 1 and 4 years. Cat bonds may or may not be rated by an independent rating agency.

COMMENTARY – FEBRUARY 2021

Securis Catastrophe Bond Fund Class B USD returned -0.43% in February 2021, taking the year-to-date return to -0.38%.

The month's negative performance is attributable to the outbreaks of severe winter weather which affected much of the USA in the middle and latter part of the month. Of these, the event involving Texas and various other southern States between the 12th and 20th February was by far the most severe. Affecting a region unprepared and unused to weather conditions of this type, insured losses have been driven by roof collapses, frozen pipes, ice accretion and power outages, and are expected to reach record levels for such an event. Securis currently estimates a \$15.4bn US Winter Storm industry loss, a record for such an event, and due to its complexity further adverse loss development cannot yet be ruled out.

Losses from this event will lead to further erosion of deductibles of securities exposed to aggregations of losses from multiple perils, all of which were already marked-down on account of the Derecho, hurricane and wildfire losses of 2020. The further February mark-downs are based on expectation of underlying losses and bid/offer levels in the market, as opposed to actual trade prices. The Fund holds three senior tranches of such securities, none of which are expected to suffer default following this event.

Five new issues were launched in the primary market during the month, four on behalf of regular cat bond market sponsors, the other a returning sponsor. SCBF has invested in two, acquiring exposure to California earthquake and US flood as a result of Named Storms. Both deals up-sized post launch and priced below initial price guidance in a sign of healthy current demand levels in the market. The remaining deals were yet to close at the date of this report.

Past performance is no guarantee of future returns. The value of investments in the Fund can go down as well as increase and may be affected by changes in rates of exchange. You may lose all or a substantial amount of your original investment. 1. Performance data is represented by the performance of SCBF Class A USD shares, net of investment management fees (0.65% annual management fee ("AMF")) and Fund expenses (Fund expenses, excluding management fees and trading related commissions and expenses, are capped at 0.25% of NAV). Share Class B has been closed since 17th November 2017 and will not be accepting any new investors or new inflows from existing investors.

Forward-Looking Statement - Certain information contained in this material constitutes forward-looking statements. Such statements are based on SIP LLP's internal models and assumptions, which are subject to certain risks, assumptions and uncertainties. There can be no assurance that the results described in these forward-looking statements will be achieved and it is likely that actual results will differ significantly from these forward-looking statements, which differences could be material and adverse. They are not a reliable indicator of future performance. The "Market (Raw) View of Risk" represents an unadjusted view of risk, as provided in underwriting submissions. Modelling uses the latest view of RMS, with additional AIR and bespoke models as and when provided, with best efforts to maintain event correlations. The Securis View of Risk is the latest internal model used for investment analysis, portfolio modelling and valuation. The view includes proprietary adjustments to the data and models provided as part of the underwriting submission; this includes adjustments for under-modelled and non-modelled risk. The two risk models may differ materially. The assumptions and methodologies utilised by SIP LLP are available upon request and may vary over time. All forward-looking statements in this document speak only as at the date of delivery of this material. SIP LLP expressly disclaims any obligation or undertaking (save as required to comply with any legal or regulatory obligations) to disseminate any updates or revisions to any forward-looking statements to reflect any changes in SIP LLP's expectations or circumstances on which any such statement is based.
