

### INVESTMENT OBJECTIVE

The Securis Catastrophe Bond Fund ("SCBF" or the "Fund") aims to generate returns and growth by investing in catastrophe bonds ("Cat Bonds"). A Cat Bond is a form of insurance linked security that transfers the risk of financial loss as a result of catastrophic events to the capital markets. The sponsors of the Cat Bonds are typically insurance companies, reinsurance companies, corporations and governments. Cat Bonds may pay fixed, floating or variable rates of interest and typically have durations of between 1 and 4 years. Cat bonds may or may not be rated by an independent rating agency.

Fund NAV impairment has been calculated allowing for no erosion to aggregate deductibles. These deductibles may have been impaired by past events, subsequently actual returns may be materially different. Projections are based on the gross performance of SCBF USD shares, excluding investment management fees and Fund expenses. Actual returns will be subject to management fees and fund expenses. Past performance is no guarantee of future returns. Risk figures, forecasts and projections ("the Figures") are based on SIP LLP's internal models and assumptions, which are derived from the Market (Raw) View of Risk. The Figures are subject to certain risks and assumptions, do not reflect actual performance and are not a guarantee of future performance. Please see the Important Notices and Definitions section at the end of this document for full disclaimers. 1. 12 month forward looking gross of fees return distribution. Actual returns will be subject to management fees and fund expenses. 2. Yield is gross and calculated on Fund's assets. Actual returns will be subject to fees and expenses. 3. Median Projected Return (gross) is defined as the mid-point on the portfolio gross returns distribution curve. 4. Historical event analysis is a scenario simulation utilising estimated modelled loss amounts as reported in the offering materials relating to each current position.

## COMMENTARY – APRIL 2022<sup>1</sup>

The Securis Catastrophe Bond Fund was down -0.02% in April 2022 taking the year to date return to +0.51%. The month's flat performance is a result of coupon income being offset by continued price declines across the market.

Despite the ongoing spread-widening environment, the primary market has remained active. In addition to the approximately \$4 billion already issued this year, a further \$1.7 billion worth of transactions were brought to market during the month. These transactions are reflective of current conditions and are being marketed at notably improved price guidance ranges and scope, from an investor's perspective. In most cases the marketing phase is taking longer than usual as arrangers struggle to match sponsors' wishes with investors' expectations. In this regard Securis has been instrumental in the process of obtaining improved terms for investors. As a result, we are of the view that investment conditions are currently extremely favourable for SCBF.

Eight series of notes were launched during the month, seven of which are on behalf of returning sponsors, and one new to the market. SCBF participated in:

- Florida named storm deal which underwent restructuring and repricing during marketing;
- US Gulf named storm deal on behalf of a US primary insurer in build-up phase, and priced accordingly;
- Indemnity based US earthquake transaction on behalf of a US primary insurer, repriced during marketing;
- North East US per occurrence indemnity deal on behalf of a blue chip US insurer, offering regional diversification;
- Indexed North America named storm and earthquake deal on behalf of a reinsurance company, repriced during marketing.

The Fund was active in the secondary market, taking advantage of market conditions, as well as realising cash to deploy into attractive primary market issues.

There were no natural catastrophe events of any concern to SCBF during the month.

## RISK CONSIDERATIONS

Lower Risk ← Higher Risk  
Potentially lower reward Potentially higher reward

Historical data may not be a reliable indication for the future risk profile of the Fund. The risk category shown is not guaranteed and may shift over time. The lowest category does not mean 'risk free'. This indicator is not a measure of the risk that you may lose the amount you have invested. We have calculated the Fund's risk and reward category, as shown above, using the methods set by European Union rules. As of 31 December 2020 the Fund is in category 3 (denoting lower risk, but with the potential for lower rewards) because it invests primarily in Cat Bonds, the value of which can fluctuate considerably.

Please refer to the prospectus for more detailed information on the investment policies, the investment manager's strategy and some of the terms used above. Prospectus and KIID can be downloaded at [www.securisinvestments.com/ucits](http://www.securisinvestments.com/ucits).
