October 2022

#### INVESTMENT OBJECTIVE

The Securis Catastrophe Bond Fund ("SCBF" or the "Fund") aims to generate returns and growth by investing in catastrophe bonds ("Cat Bonds"). A Cat Bond is a form of insurance linked security that transfers the risk of financial loss as a result of catastrophic events to the capital markets. The sponsors of the Cat Bonds are typically insurance companies, reinsurance companies, corporations and governments. Cat Bonds may pay fixed, floating or variable rates of interest and typically have durations of between 1 and 4 years. Cat bonds may or may not be rated by an independent rating agency.

Fund NAV impairment has been calculated allowing for no erosion to aggregate deductibles. These deductibles may have been impaired by past events, subsequently actual returns may be materially different. Projections are based on the gross performance of SCBF USD shares, excluding investment management fees and Fund expenses. Actual returns will be subject to management fees and fund expenses. Past performance is no guarantee of future returns. Risk figures, forecasts and projections ("the Figures") are based on SIP LLP's internal models and assumptions, which are derived from the Market (Raw) View of Risk. The Figures are subject to certain risks and assumptions, do not reflect actual performance and are not a guarantee of future performance. Please see the Important Notices and Definitions section at the end of this document for full disclaimers. 1. 12 month forward looking gross of fees return distribution. Actual returns will be subject to management fees and fund expenses. 2. Yield is gross and calculated on Fund's assets. Actual returns will be subject to fees and expenses. 3. Monthly Fact Sheet
October 2022

### COMMENTARY - OCTOBER 20221

The Securis Catastrophe Bond Fund was up +1.15% in October 2022 taking the year-to-date return to -3.63%. The month's positive performance is attributable to recoveries in the prices of a number of positions marked-down last month in the immediate aftermath of Hurricane Ian.

During the course of the month more detailed information has emerged relating to the potential insurance losses caused by Ian. In several cases this has included formal reporting of loss estimates by sponsors of bonds. These estimates have suggested that the potential for loss to the bond market may be less than was factored into prices at the end of September, published just two days after Ian made landfall. Bid levels in the secondary market supported this view. As a result, all of the bonds held by the Fund considered potentially exposed to Ian experienced price recoveries over the month.

In the meantime the market sought liquidity mostly in non-US Wind exposed bonds. Almost without exception these traded below current marks, thus offsetting some of the gains experienced on the lan-exposed positions.

Towards the end of the month we saw the launch of the first post hurricane season primary issue. This was two tranches of the perennial Residential Re program. The issue offers a clear verification of how spreads have widened in the past year. At the upper end of price guidance, which is likely to be achieved, we would see a risk adjusted return on capital of just under 100% compared to the equivalent issue one year earlier.

A succession of primary issues are due to be launched in the month ahead. The terms of these issues can similarly be expected to reflect the continuing mismatch between capital supply and demand, likely to be reflected in tightened conditions and widened spreads. We see no evidence that this situation is likely to change in the near term and we remain of the view that current investment conditions for the Fund are unprecedented.

### **RISK CONSIDERATIONS**

Historical data may not be a reliable indication for the future risk profile of the Fund. The risk category shown is not guaranteed and may shift over time. The lowest category does not mean 'risk free'. This indicator is not a measure of the risk that you may lose the amount you have invested. We have calculated the Fund's risk and reward category, as shown above, using the methods set by European Union rules. The Fund is in category 3 (denoting lower risk, but with the potential for lower rewards) because it invests primarily in Cat Bonds, the value of which can fluctuate considerably.

Please refer to the prospectus for more detailed information on the investment policies, the investment manager's strategy and some of the terms used above. Prospectus and KIID can be downloaded at www.securisinvestments.com/ucits.
