

INVESTMENT OBJECTIVE

The Securis Catastrophe Bond Fund ("SCBF" or the "Fund") aims to generate returns and growth by investing in catastrophe bonds ("Cat Bonds"). A Cat Bond is a form of insurance linked security that transfers the risk of financial loss as a result of catastrophic events to the capital markets. The sponsors of the Cat Bonds are typically insurance companies, reinsurance companies, corporations and governments. Cat Bonds may pay fixed, floating or variable rates of interest and typically have durations of between 1 and 4 years. Cat bonds may or may not be rated by an independent rating agency.

COMMENTARY – January 2023

The Securis Catastrophe Bond Fund was up +1.79% in January 2023. The month's strong performance has been driven by a combination of further price recovery in positions potentially exposed to Hurricane Ian and unsatisfied buy interest in the secondary market. After December's flurry of activity, the primary market was quiet, as is typically the case in January. There was just one cat bond issue priced during the month, in which the Fund did not participate, and two new issues were launched, both on behalf of repeat sponsors.

In the secondary market we observed a change of dynamic over the course of the month. It appears that much of the cash released from securities maturing in December and early January has remained in the market, as investors have opted to focus on cat bonds as opposed to switching out into private investments. This, combined with modest in-flows, has prompted a significant increase in buy interest over the course of the month pressuring spreads which dropped a little off December's historical highs. Nonetheless the Fund was able to realise value in the secondary market, making a number of purchases, mostly in the first half of the month.

There were no catastrophe events during the month affecting the Fund. We expect primary issuance to pick-up later in February/March. Current indicators are that there is a full pipeline of deals ahead which is likely to more than match investor demand, thus underpinning spreads and terms.

Prices quoted refer to accumulation shares, unless otherwise stated. Historic data may be subject to restatement from time to time.

Forward-Looking Statement - Certain information contained in this material constitutes forward-looking statements. Such statements are based on SIP LLP's internal models and assumptions, which are subject to certain risks, assumptions and uncertainties. There can be no assurance that the results described in these forward-looking statements will be achieved and it is likely that actual results will differ significantly from these forward-looking statements, which differences could be material and adverse. They are not a reliable indicator of future performance. The "Market (Raw) View of Risk" represents an unadjusted view of risk, as provided in underwriting submissions. Modelling uses the latest view of RMS, with additional AIR and bespoke models as and when provided, with best efforts to maintain event correlations. The Securis View of Risk is the latest internal model used for investment analysis, portfolio modelling and valuation. The view includes proprietary adjustments to the data and models provided as part of the underwriting submission; this includes adjustments for under-modelled and non-modelled risk. The two risk models may differ materially. The assumptions and methodologies utilised by SIP LLP are available upon request and may vary over time. All forward-looking statements in this document speak only as at the date of delivery of this material. SIP LLP expressly disclaims any obligation or undertaking (save as required to comply with any legal or regulatory obligations) to disseminate any updates or revisions to any forward-looking statements to reflect any changes in SIP LLP's expectations or circumstances on which any such statement is based.
