

INVESTMENT OBJECTIVE

The Securis Catastrophe Bond Fund ("SCBF" or the "Fund") aims to generate returns and growth by investing in catastrophe bonds ("Cat Bonds"). A Cat Bond is a form of insurance linked security that transfers the risk of financial loss as a result of catastrophic events to the capital markets. The sponsors of the Cat Bonds are typically insurance companies, reinsurance companies, corporations and governments. Cat Bonds may pay fixed, floating or variable rates of interest and typically have durations between 1 and 4 years. Cat bonds may or may not be rated by an independent rating agency.

COMMENTARY – December 2023¹

The Securis Catastrophe Bond Fund was up +0.92% in December 2023, bringing the full year to +16.21%, by some margin a record annual return for the Fund. A unique confluence of factors has driven this performance:

- High levels of demand have been experienced throughout the year as insurance companies looked to the cat bond market as a reliable means of addressing increased risk transfer requirements driven by external factors such as recent inflation, asset base impairment linked to interest rate movement, and consequent capacity shortages in the traditional reinsurance market.
- Incremental spread tightening over much of the year, largely as a result of a rebound from depressed end of 2022 prices and in particular bonds that were marked down due to their potential exposure to Hurricane Ian.
- An improved outlook for insurance inflation, which has led to rising prices in index bonds tied to insurance industry losses.
- Improved levels of coupon income generated on bonds issued in the above average spread environment of the last 18 months, in conjunction with floating returns on risk-free underlying assets which have reached levels not seen since the beginning of the century.
- A low level of natural catastrophe events impacting the market.

The month saw continued high levels of primary market activity. Another \$1bn of deals were launched resulting in a full year's issuance of over \$15bn, taking the overall market to \$42bn – an increase of 20% over the year, making it a record.

Following the pattern of Q4, more than half the new issues were on behalf of either new sponsors, or sponsors returning to the market after absences of many years. The Fund invested in a range of these bonds acquiring indemnity exposure to regional US perils and an index based North America hurricane and earthquake protection.

Looking ahead to 2024, while the unique confluence of circumstances that influenced this year's performance is not expected to be repeated, we nonetheless expect positive conditions to continue. The current characteristics of strong supply, good liquidity and market discipline should continue, while spreads remain at levels not persistently seen in a decade.

Given recent experience and positive outlook, it is quite likely new capital will be attracted to the market in the months ahead. However, broadening sponsor demand, and the fundamentals driving that demand, are likely to persist such that in the near-term we anticipate the balance of demand versus supply should temper pressure on spreads. We believe these market conditions offer a good platform for the Fund to continue to implement its selective and defensive investment strategy.

RISK CONSIDERATIONS

Historical data may not be a reliable indication for the future risk profile of the Fund. The risk category shown is not guaranteed and may shift over time. The lowest category does not mean 'risk free'. This indicator is not a measure of the risk that you may lose the amount you have invested. We have calculated the Fund's risk and reward category, as shown above, using the methods set by European Union rules. The Fund is in category 3 (denoting lower risk, but with the potential for lower rewards) because it invests primarily in Cat Bonds, the value of which can fluctuate considerably.

Please refer to the prospectus for more detailed information on the investment policies, the investment manager's strategy and some of the terms used above. Prospectus and KIID can be downloaded at www.securisinvestments.com/ucits.
