What is this product?

Type: An open-ended umbrella Irish collective asset-management vehicle with segregated liability between sub-funds formed in Ireland under the Irish Collective Asset-management Vehicles Act 2015 and authorised by the Central Bank as a UCITS pursuant to the Regulations. The Fund invests primarily in catastrophe bonds ("Cat Bonds").

Objectives and Investment Policy: The Fund aims to generate returns and growth by investing in Cat Bonds". A Cat Bond is a form of insurance linked security that transfers the risk of financial loss as a result of catastrophic events to the capital markets. The sponsors of the Cat Bonds are typically insurance companies, reinsurance companies, corporations and governments. Cat Bonds may pay fixed, floating or variable rates of interest and typically have durations of between 1 and 4 years.

The return an investor achieves, through exposure to Cat Bonds, is linked to the incidence of pre-specified catastrophe events occurring within a particular time period. Investors receive a risk premium in the form of a coupon in exchange for bearing the risk of loss of principal as a consequence of pre-defined natural, non-natural and catastrophe related events.

The Fund is actively managed without reference to any benchmark meaning that the investment manager has full discretion over the composition of the Fund's portfolio, subject to the stated investment objectives and policies. The investment strategy relies on a detailed analysis of the Cat Bond market to identify investments it considers will provide an appropriate balance of risk and return. The geographical focus of the Fund's investment is worldwide.

The Fund aims to remain fully invested at all times and hold small amounts of cash. The Fund has both accumulating and distributing share classes. The Fund uses investment techniques to protect the value of the Fund against changes in currency exchange rates.

Please refer to the prospectus for more detailed information on the investment policies, the investment manager's strategy, key risks and some of the terms used above.

Intended Retail Investor: The product is intended for retail investors who have sufficient knowledge and/or experience with financial products or have received financial advice from expert advisors. It is suitable for investors who can bear losses up to the complete loss of the invested capital and do not require capital protection.

Product Term: You can sell your shares in the Fund on a twice-monthly basis by submitting an application to the Fund's administrators 5 business days before the relevant dealing day. This Fund may be appropriate for investors who have an investment horizon of 5 years.

What are the risks and what could I get in return?

Lower Risk ← → Higher Risk
Potentially lower reward Potentially higher reward

The summary risk indicator (SRI) assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The Fund does not guarantee capital protection, your investment is not guaranteed.

Liquidity risk: In difficult market conditions, the Fund may not be able to sell a security for full value or at all. This could affect performance and could cause the Fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

A more detailed description of the risk factors that may apply to the Fund is set out in the prospectus.

Favourable Scenario		
What you might get back after costs	\$11,625.63	\$13,257.41
Average return each year	16.26%	5.80%

**Recommended holding period*

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest \$10,000.

Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The unfavorable, moderate, and favorable scenarios shown are illustrations using the worst, average, and best performance of the Product over the last 10 years. Markets could develop very differently in the future.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies and are not an exact indicator. What you will get will vary depending on how the market performs and how long you keep the product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The Unfavourable scenario occurred for an investment between 13/10/2017 to 14/10/2022

The Moderate scenario occurred for an investment between 15/07/2016 to 16/07/2021

The Favourable scenario occurred for an investment between 31/12/2019 to 31/12/2024

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor.

The figures may be affected by changes in rates of exchange and do not take into account your personal tax situation, which may also affect how much you get back.

Tax treatment in the investor's home state may have an impact on the actual payout.

What happens if the Manager is unable to pay you out?

For your protection the Fund's assets are held with a separate company, a custodian. The Fund's ability to pay out would not be affected by the insolvency of the Manager. If the Fund is terminated or wound up, the assets will be liquidated, and you will receive an appropriate share of any proceeds but you may lose part or all of your investment.

What are the costs?

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. Advisors, distributors or any other person advising on, or selling, the PRIIP will provide information detailing any cost of distribution that is not already included in the costs specified below.
